Informed Consent – LED Light Therapy

Credentials

I understand that **Sandi Newton** is a Certified Light Therapist providing LED (Light Emitting Diode) light therapy services and is not a medical doctor.

Disclaimer

I understand that **Sandi Newton** is not a licensed physician and is not licensed to diagnose or treat specific diseases. If a medical diagnosis or treatment is required, it must be obtained from a licensed physician.

Scope of Practice

Light therapy is a process whereby the device emits a bandwidth of light to certain parts of the body thereby helping repair damaged cells. Light radiation must be absorbed to produce biological responses such as pain reduction and increased circulation. I understand that light therapy is only being utilized for the purpose of pain reduction and increasing localized circulation, as per the device's FDA clearance. It is not intended to treat or cure any disease.

Benefits of Light Therapy

The expected benefits from undergoing light therapy for areas upon which LED pads are placed include pain reduction and a localized increase in circulation.

Contraindications

Light therapy is non-invasive. It is important to notify the practitioner if your medical history changes such as becoming pregnant or if you have been diagnosed with an unexpected medical condition.

Please answer the following questions:

Do you have any of the following conditions?

- Yes | No Do you have chronic low blood pressure?
- Yes | No Do you have a history of epilepsy?
- Yes | No Do you have an active carcinoma?
- Yes | No Do you take blood thinners?
- Yes | No Do you take nitrates such as nitroglycerin?
